# AS Splibox ARC welding

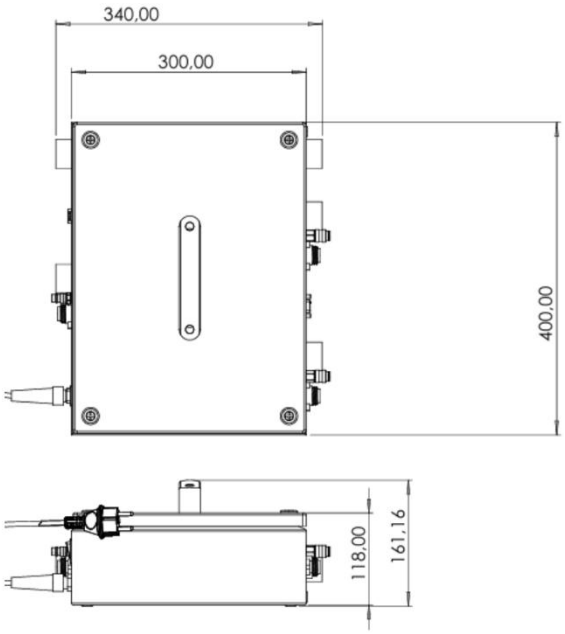

article nb. 19010006 **Arnhold Bolzenschweissen**

## Splitbox for arc studwelder

What is better than one welding gun on an Arnhold stud welding unit? Exactly two welding guns.
This is now possible with the As Splitbox. It allows two welding guns to be connected to one studwelder at the same time. This enables to work in alternating mode on one device or to save setup times. This is possible with the configuration with two guns with different equipment which can be connected directly to one device. Furthermore, the Splitbox enables Budget Automations to operate two welding heads with one welding machine.

**dimensions:**

| technical data | |
|---|---|
| number of connection output ports | 1x Sub D (CNC controlling)<br>1x mass<br>2x gun plugs (control Plug 7Pol)<br>also with shielding gas connection |
| shielding gas | aktivation/ deaktivation option in studwelder menue |
| use cases | alternating mode or single mode |
| wight | 9,8kg |
| equipment | mass cable<br>Sub D connection cable<br>gun connection cable<br>(each length of 2m) |
